to understanding surcharge

Are you ready for New Rules on Surcharge?

The New Rules

The Good News: Merchants can pass on the cost of acceptance to their consumers.

The Bad News: The Reserve Bank of Australia rules make the process of managing surcharge risk based on the variable requirements and quarterly changes. The ACCC have been given the powers to enforce the change with harsh penalties up to \$108,000.

The Good News:

The E Group supports businesses with Surcharge Eftpos and ePayment solutions that are compliant with the Reserve bank of Australia new rules on surcharge.

Here is how we help:

- **Neutralise your Merchant Service fees** so that you have nothing to pay at the end of the month
- **No need to change your surcharge** every quarter
- **No need to update your signage** every quarter
- **No need to update your POS** every quarter
- **No need to retrain your staff** every quarter
- **Payment Card Industry Data Security Standard systems** (PCI-DSS)
- **Reduce the risk** of the ACCC fines on surcharge
- **No need to change bank accounts**
- **You keep 100% of the transaction**, we cover all transaction fees and *terminal hardware costs
